LANCER TACTICAL
2020 SHOWCASE CATALOG

Established in 2012, Lancer Tactical combines high performance with innovative designs, such as the Enforcer AEG series, Proline Gen-2, and upcoming Legion HPA system. Throughout airsoft campaigns and tournaments, the brand promotes the image of reliability to professional players.

Lancer Tactical also provides durable, affordable tactical gear to meet both military simulation and airsoft gameplay.

"SET TO WIN." is a trademark of Lancer Tactical and one of the core components of Lancer Tactical. The slogan was coined in 2018.

ENFORCER BLACKBIRD

PRODUCT FEATURES

- Lancer Tactical Electric Trigger Unit (ETU) and MOSFET with fire cutoff system to fully optimize performance, snappy trigger response, cyclic rate, accuracy. The Lancer Fast Trigger pushes about 20-25 RPS, and shoots consistently within a 2-3 FPS range.
- Reinforced redesigned metal version Gen-2 gearbox with ultra-smooth 8mm bearings, 18:1 steel gears, steel teeth polycarbonate piston, reduced heat spikes 16AWG wires, bearing spring guide, rotary Hop-up, 25,000 RPM neodymium magnet high-speed motor for consistent performance
- Quick change spring design, accessible through buffer tube
- Flat trigger and enlarged trigger guard design
- Lightweight durable aluminum free float licensed M-LOK rail system

SPECIFICATIONS

OPERATION	ELECTRIC AUTOMATIC
MATERIAL	METAL RECEIVERS, OUTER BARREL, M-LOK RAILS / POLYMER STOCK, PISTOL GRIP
MAGAZINE CAPACITY	120 ROUNDS / 70 ROUNDS (ALPHA STOCK SECONDARY)
HOP-UP	YES, ADJUSTABLE (ROTARY)
INNER BARREL DIAMETER	6.03 MM
GEARBOX	VERSION 2 (METAL) w/ ETU & MOSFET
HANDGUARD LENGTH	11.5 INCH

- Copper polished 6.03 mm tight bore barrel improves range and accuracy (200+ feet with 0.20g BBs)
- Comes with a 120rd metal midcap magazine and a 70rd fast mag which can be stored in the Alpha Stock
- Ergonomically designed polymer textured grip
- Operable dust cover reveals a rotary style hop-up
- Full length 20mm top rail for scopes, sights and magnifiers
- Low resistance wiring prevents potential damage from the battery
- Fires in full-auto and semi-auto, with a functional safety

PROLINE INTERCEPTOR SPR

PRODUCT FEATURES

- Built-in Lancer Fast Trigger with MOSFET to regulate electric flow and protect trigger contacts
- Full metal upper/lower receivers, one-piece outer barrel, CNC buffer tube
- Free float full metal rail M-LOK handguard with top and front Picatinny rails
- Quick-change spring system for rapidly adjusting muzzle velocity
- Low-resistance wiring prevents potential damage from the battery
- Enhanced motor pistol grip with positive texturing for improved handling
- Ball bearing spring guide withstands higher stress from gearbox cycle
- Polished 6.03 mm tight bore inner barrel for improved air seal and accuracy
- Full metal Version 2 rear-wired gearbox provides easy battery access and ample space
- 20mm top optic rail mounts scopes, sights, and magnifiers
- Enlarged trigger guard and enhanced pistol grip
- One-piece outer barrel provides stability and zero wobble
- Upgraded gearbox with 18:1 steel gear set and high-speed motor
- LiPo-ready Proline AEG shoots at 22 RPS with 11.1V LiPo battery (battery/charger not included)
- Improved crane stock with rubberized buttpad w/ double-sided sling mount

PRODUCT FEATURES

- Built-in Lancer Fast Trigger with MOSFET to regulate electric flow and protect trigger contacts
- Full metal upper/lower receivers and CNC machined buffer tube
- Quick-change spring system for rapidly adjusting muzzle velocity
- Low-resistance wiring prevents potential damage from the battery
- Enhanced motor grip with positive texturing for improved handling
- Ball bearing spring guide withstands higher stress from gearbox cycle
- Polished 6.03 mm tight bore inner barrel for improved air seal and accuracy
- Full metal Version 2 rear-wired gearbox provides easy battery access and ample space
- 20mm top optic rail mounts scopes, sights, and magnifiers
- Enlarged trigger guard accommodates users wearing gloves
- One-piece outer barrel provides stability and zero wobble
- Upgraded gearbox with 18:1 steel gear set and high-speed motor
- LiPo-ready Proline AEG shoots at 22 RPS with 11.1V LiPo battery (battery/charger not included)
- Lancer Tactical 120rd midcap magazine and 1,000rd bag of 0.20g premium BBs included
- Improved crane stock with rubberized buttpad w/ double-sided sling mount

GEN-2 HYBRID SERIES

THE DIFFERENCE

The Lancer Tactical Hybrid Series sports the same ProLine internals but with a key difference. Instead of a full metal body, Hybrid AEGs come with nylon polymer upper and lower receivers, making your rifle lightweight yet solid. And unlike the Lancer Tactical G2 rifles, the Hybrid series AEGs feature a full metal railed handguard. If you want the best of both worlds, Hybrid is the way to go.

The 6.03mm stock tightbore barrel further increases range and FPS, and an injected polymer rotary style hop-up adjusts BB spin effortlessly for maximum precision. Upgraded with an 18:1 reinforced steel gear set to provide a quicker cycling rate and 8mm bushings to enhance the operational smoothness of your gears. These upgraded internals increase shot to shot consistency with minimal wear to your internals. The powerful 25k high torque motor is regulated to maximum efficiency with low resistance copper wiring and a bonus battery protection feature! When low voltage is detected from a drained battery, an automatic cut off keeps equipped batteries from draining completely, vastly increasing battery life and longevity. Replace your springs and alter your FPS without opening up your gearbox! A true quick change spring system enables adjustment from CQB to outdoor and back through unlocking the mechanism secured inside the buffer tube.

THE LANCER "FAST TRIGGER"

Lancer Tactical Hybrid Gen 2 AEGs come fully equipped with the Lancer Fast Trigger just like the ProLine series. Modeled with a bladed flat trigger design, an ETU and a MOSFET all located within the gearbox, additional wiring has been reduced, amplifying trigger response. The Lancer Fast Trigger pushes about 20-25 RPS, and shoots consistently within a 2-3 FPS range.

AK SERIES

HISTORY

The Kalashnikov Model 1947, or AK-47 for short, is a gas-operated assault rifle. The initials AK represent Avtomat Kalashnikova, Russian for "automatic Kalashnikov," for its designer, Mikhail Kalashnikov, who designed the accepted version of the weapon in 1947.

The model and its variants remain the most popular and widely used assault rifles in the world because of it being simple to operate, rugged, reliable under trying conditions, and amenable to mass production.

MAVERICK M4 RECEIVER

INTRODUCTION

Lancer Tactical reveals the newest addition to the company's AEG external parts product line, the Maverick M4 full metal receiver.

PRODUCT FEATURES

- Flat top Picatinny rail for mounting optics
- Enlarged magazine release button
- Ambidextrous selector switch
- Stylized slat design
- Enlarged magwell

WY800 COMPRESSOR

PRODUCT FEATURES

- Perfect for filling HPA tanks for airsoft/paintball and PCP air guns
- Ability to set pressure range from 0 to 6,000 PSI (400 BAR)
- Displays current pressure, running time and temperature on display screen
- Easy-to-use: connect coupler to tank, tighten bleed valve, set the pressure, start the compressor
- Conveniently fills HPA tanks with air (only fill to the max limit)
- Runs off voltage supply of 110V and rated at 1500 watts

PACKAGE INCLUDES

1X Non-Slip Wheel Pad, 2X High Pressure Hoses, 1X Plastic Input Air Filter, 1X Output Large Air Filter, 1X O-Ring Kit [2X LP Piston Rings, 4X HP Pistol Rings, 2 HP Piston O-Rings, 3X Bleed Valve O-Rings, 3X Water O-Rings, 4X Screw O-Rings]

SPECIFICATIONS

WORKING PRESSURE	4500 PSI / 300 BAR
MAX PRESSURE	6000 PSI / 400 BAR
VOLTAGE	110V 50Hz
RPS POWER	1500 WATT
RPM	1400-1700
FILL SPEED	42L/Min
LENGTH	14.9"
HEIGHT	15.5"
DEPTH	14.9"
WEIGHT	66 LBS

As Shown: LT-COMPRESSOR-WY800

LEGION HPA SYSTEM

WHAT IS IT?

High pressure air (HPA) airsoft guns use compressed air to fire out BBs. It's quite a unique system that takes components of gas blowback systems and Automatic Electric Guns (AEGs), making a completely different system that is mechanical pneumatic.

MAKING THE SWITCH

When making the switch from AEG to HPA, you don't have to worry about typical AEG maintenance issues. Instead of having a motor move the gears, pushing the spring back, building pressure in the cylinder and releasing it through the nozzle to force the BB out of the barrel, a HPA engine just has air pushing straight through the nozzle, thus shortening the time and process by incredible lengths. You just need a tank with regulator, line, and engine.

M40A3 SNIPER RIFLE

PRODUCT FEATURES

- High quality dense polymer body with reinforced full metal bolt assembly
- Smooth bolt pull and push that makes it easier to load and charge each round
- Replica to the real M40A3 sniper rifle with improved steel bolt and metal rails
- Unique stippling on body for better grip and hand placement
- Long flush inner barrel improving accuracy especially at longer distances
- Picatinny rail mount on bottom for mounting bipods for improved stability
- Optic mount that allows a variety of different rifle scopes with magnification
- Adjustable cheek riser ensures that your your eye is completely aligned with a rifle scope
- Included magazine holds up to 27 rounds and easily loads with speedloader
- Shoots approximately 410 to 430 FPS using 0.20g BBs, making it field-ready for any airsoft sniper

RHINO REVOLVER 50DS .357 MAGNUM

OVERVIEW

The Rhino 50DS sports a unique design that sets it apart from other revolvers. The barrel aligns with the bottom of the cylinder, lowering the bore axis. Over to the rear, a low-profile hammer acts as a cocking device. The actual firing mechanism sits internally, allowing you to shoot in both double action or single action. A red indicator indicates whether the internal hammer is cocked or not.

CONNECTOR	MINI TAMIYA
BATTERY	8.4V BRICK (NOT INCLUDED)
MAGAZINE CAPACITY	100 ROUNDS (MID-CAPACITY)
HOP-UP	YES, ADJUSTABLE
MSRP	\$459.00

PRODUCT FEATURES

- 1:1 scale replica of German-issued MP40 of World War II
- Full steel construction, aluminum outer barrel
- Realistic weather finish gives it a battleorn look
- Fully assembled by hand with unique serial numbering on each part
- Electric blowback system provides added realism
- Full metal Version 3 gearbox with high torque motor and 8mm bearings
- Great attention to detail on dark brown bakelite-style furniture
- Underfolding wire full steel stock
- Shoots 18 rounds per second with 11.1V LiPo battery
- Shoots in full-auto only just like the real MP40

BREAK BARREL AIR RIFLE

QUANICO RIFLE

- Break barrel system
- Automatic security when armed
- High density polymer stock adjustable on 3 axes
- Adjustable height and length stock with adjustable cheek support.
- Double 21mm Picatinny mounting rail system and 11mm rail (under Picatinny rail)
- Fiber optic adjustable sights
- Extremely deep bluing
- High-end Internal parts

QUANICO BIS RIFLE

- Break barrel system
- Automatic security when armed
- High density polymer stock adjustable on 3 axes
- Adjustable height and length stock with adjustable cheek support
- Double 21mm Picatinny mounting rail system and 11mm rail (under Picatinny rail)
- Fiber optic adjustable sights
- Extremely deep bluing
- High-end Internal parts
- Full steel twisted barrel

PENDLETON TACTICAL RIFLE

- Break barrel system
- Hi density polymer stock
- 5 positions telescopic stock (AR15 style, fits all AR15 stocks on tube)
- 21mm Picatinny mounting top rail
- Picatinny side and bottom rails for accessories
- Removable pistol grips
- Adjustable fiber optics sights
- Deep bluing treatment
- High-end internal parts

BENNING RIFLE

- Break barrel system
- Adjustable stock with cheek riser
- 21mm Picatinny mounting top rail
- Durable and heavy construction

M2 HPA HEAVY MACHINE GUN

HISTORY
The M2 machine gun, aka "ma deuce," is the oldest machine gun currently in production anywhere in the world. Designed by legendary designer John Browning, it was widely used by land, naval, and air forces in World War II. In addition to being used by infantry forces mounted on a tripod, variants of the M2 machine gun have also been used in aircraft, mounted on wheeled and tracked vehicles, and even fitted with telescopic scopes and used for long range sniper work.

SPECIFICATIONS	
SKU	LT-M2

MK19 GRENADE LAUNCHER

OVERVIEW

The Lancer Tactical MK19 Grenade Launcher, based off the 40mm belt-fed grenade launcher primarily used by the U.S. Armed Forces, is an intimidating airsoft gun chambered in 6mm. This 1:1 scale replica is a functional airsoft gun. Equipped with two inner barrels, you can double tap your targets with each shot. The MK19 is designed for Military Simulation operations and is built with two HPA engines, delivering round after round in full auto.

E-RAZ GRENADE

SPECIFICATIONS

BRAND	Z-Parts
OPERATION	Green Gas
MATERIAL	Fiber Polymer / Metal Sphere
COMPATIBILITY	Fits in 40mm Grenade Pouches
LENGTH	2"
HEIGHT	3.5"
WEIGHT	5 OZ

PRODUCT FEATURES

- High density polymer build is lightweight but can withstand multiple drops and is completely reusable
- Simple to use: insert pin, fill grenade with green gas, use standard speedloader to pour in 100 BBs, and you're ready to go
- Disperses a complete 360 degrees after pulling pin and making impact on surface
- Perfect for clearing rooms and taking out multiple opponents within the area (ask your local field first before using)
- Fits a 40mm grenade pouch making it great for most players who already own these pouches
- Can hold up to 100 rounds of 6mm BBs and uses standard green gas (fill for six to eight seconds)

BIO TRACER BB'S

OVERVIEW

Our current brand of Bio Tracer BBs provide an eco-friendly alternative to traditional airsoft ammunition without compromising on quality.

PRODUCT FEATURES

- High quality seamless and polished BBs (5.95mm +/- 0.01)
- Perfect smooth, spherical BBs designed for precision
- High performance BBs provide accuracy
- Tough and durable construction means less chipping and shattering
- Biodegradable design perfect for outdoor and MilSim events
- Compatible with all 6mm airsoft guns
- Glow in the dark design activated by tracer units
- Comes with 2000 rounds of 6mm airsoft BBs
