Established in 2012, Lancer Tactical combines high performance with innovative designs, such as the Enforcer AEG series, Proline Gen-2, and upcoming Legion HPA system. Throughout airsoft campaigns and tournaments, the brand promotes the image of reliability to professional players.

Lancer Tactical also provides durable, affordable tactical gear to meet both military simulation and airsoft gameplay.

**"SET TO WIN."** is a trademark of Lancer Tactical and one of the core components of Lancer Tactical. The slogan was coined in 2018.

**SET TO WIN™**  
THIS IS LANCER TACTICAL

# GEN 3

## SERIES KEY FEATURES

- Constructed with a high-strength polymer that is lightweight, yet extremely durable.
- Built-in Zion Arms electronic trigger unit that can be programmed to shoot in varying burst modes.
- Now equipped with a deans connector that helps with saving more space for higher capacity batteries.
- Comes out of the box firing at 380 - 400 FPS. But now packaged with an additional low-FPS spring, allowing the users to be able to switch their springs on the fly with Lancer Tactical's quick change spring system that is accessed through the buffer tube.
- Reinforced metal Gen-2 gearbox with ultra smooth 8mm ball bearings, 18:1 steel gear set, steel teeth polycarbonate piston, bearing spring guide, rotary hop-up, 19,000 RPM high torque motor for consistent performance
- High-speed 130 round mid-capacity magazine that ensures proper feeding and helps prevents jams
- Newly designed pistol grip offers textured side panels with front and back strap serrations give user additional grip
- Polished 6.03mm tightbore inner barrel improves range and accuracy
- Upgraded flip-up front and rear iron sights w/ quick deploy release
- Retractable stock adjusts to meet comfort of any battle situations

## SPECIFICATIONS

OPERATION	ELECTRIC AUTOMATIC
MATERIAL	METAL RECEIVERS, OUTER BARREL, M-LOK RAILS / POLYMER STOCK, PISTOL GRIP
HOP-UP	YES, ADJUSTABLE (ROTARY)
INNER BARREL DIAMETER	6.03 MM
GEARBOX	VERSION 2 (METAL) w/ ETU & MOSFET

# FRONTIER SWIFT

## PRODUCT FEATURES

- Zion Arms Nebula ETU offers a wide range of preset configurations ranging from 2 to 5 round burst fire, with a binary trigger option.
- Lancer Tactical Electric Trigger Unit (ETU) and MOSFET with fire cutoff system to fully optimize performance, snappy trigger response, cyclic rate, accuracy. The Lancer Fast Trigger pushes about 20-25 RPS, and shoots consistently within a 2-3 FPS range.
- Reinforced redesigned metal version Gen-2 gearbox with ultra-smooth 8mm bearings, 18:1 steel gears, steel teeth polycarbonate piston, reduced heat spikes 16AWG wires, bearing spring guide, rotary Hop-up, 25,000 RPM neodymium magnet high-speed motor for consistent performance
- Quick change spring design, accessible through buffer tube
- Flat trigger and enlarged trigger guard design
- Lightweight durable aluminum free float licensed M-LOK rail system
- Copper polished 6.03 mm tight bore barrel improves range and accuracy (200+ feet with 0.20g BBs)
- Comes with a 120rd metal midcap magazine and a 70rd fast mag which can be stored in the Alpha Stock
- Ergonomically designed polymer textured grip
- Operable dust cover reveals a rotary style hop-up
- Full length 20mm top rail for scopes, sights and magnifiers
- Low resistance wiring prevents potential damage from the battery
- Fires in full-auto and semi-auto, with a functional safety

MSRP	\$294

## FEATURES

- Upgraded with reinforced steel gears that is set to provide a quicker cycling rate and 8mm bushings to enhance the operational smoothness of your gears
- The powerful 19k motor is regulated to a maximum efficiency with low resistance copper wiring and battery protection feature
- Low voltage battery detection that automatically cuts off to keep your equipped battery from draining completely which increases battery life and longevity
- Replace your springs and alter your FPS without opening up your gear-box with the Lancer Tactical quick change spring system
- The 6.03mm stock tightbore barrel further increases range and FPS
- Curved trigger that is traditional to the real steel AKs paired with the Lancer Tactical ETU Mosfet to give astonishing trigger response
- 3 position crane stock that adds some adjustability and modernisms to your AK
- Traditional AK style iron sights that is adjustable for windage
- 10.5 inch fully CNC metal M-LOK handguard that offers ample space to mount your favorite M-LOK accessories

## AK SERIES

---

### **HISTORY**

The Kalashnikov Model 1947, or AK-47 for short, is a gas-operated assault rifle. The initials AK represent Avtomat Kalashnikova, Russian for "automatic Kalashnikov," for its designer, Mikhail Kalashnikov, who designed the accepted version of the weapon in 1947.

The model and its variants remain the most popular and widely used assault rifles in the world because of it being simple to operate, rugged, reliable under trying conditions, and amenable to mass production.

## SPECIFICATIONS

OPERATION	ELECTRIC AUTOMATIC
MATERIAL	METAL RECEIVERS, OUTER BARREL, BUFFER TUBE / POLYMER STOCK, PISTOL GRIP
MAGAZINE	120 ROUNDS / 70 ROUNDS (ALPHA STOCK SECONDARY)
HOP-UP	YES, ADJUSTABLE (ROTARY)
INNER BARREL	YES, ADJUSTABLE (ROTARY)
DIAMETER	6.03 MM
GEARBOX	VERSION 2 (METAL)
HANDGUARD	14 / 10 / 7 / 4 INCH

As Shown: LT-34BB10-G2-ME [Hand stop, optics, and hex mag not included in base model]

# PROLINE INTERCEPTOR SPR

## PRODUCT FEATURES

- Built-in Lancer Fast Trigger with MOSFET to regulate electric flow and protect trigger contacts
- Full metal upper/lower receivers, one-piece outer barrel, CNC buffer tube
- Free float full metal rail M-LOK handguard with top and front Picatinny rails
- Quick-change spring system for rapidly adjusting muzzle velocity
- Low-resistance wiring prevents potential damage from the battery
- Enhanced motor pistol grip with positive texturing for improved handling
- Ball bearing spring guide withstands higher stress from gearbox cycle
- Polished 6.03 mm tight bore inner barrel for improved air seal and accuracy
- Full metal Version 2 rear-wired gearbox provides easy battery access and ample space
- 20mm top optic rail mounts scopes, sights, and magnifiers
- Enlarged trigger guard and enhanced pistol grip
- One-piece outer barrel provides stability and zero wobble
- Upgraded gearbox with 18:1 steel gear set and high-speed motor
- LiPo-ready Proline AEG shoots at 22 RPS with 11.1V LiPo battery (battery/charger not included)
- Improved crane stock with rubberized buttpad w/ double-sided sling mount

## SPECIFICATIONS

OPERATION	ELECTRIC AUTOMATIC
MATERIAL	METAL RECEIVERS, OUTER BARREL, RAILS / POLYMER STOCK, PISTOL GRIP
MAGAZINE CAPACITY	120 ROUNDS
GEARBOX	VERSION 2 (METAL) w/ ETU & MOSFET
HOP-UP	YES, ADJUSTABLE (ROTARY)
INNER BARREL DIAMETER	6.03 MM
HANDGUARD LENGTH	16.5 INCH w/ COMPRESSOR

# GEN-2 HYBRID SERIES

## THE DIFFERENCE

The Lancer Tactical Hybrid Series sports the same ProLine internals but with a key difference. Instead of a full metal body, Hybrid AEGs come with nylon polymer upper and lower receivers, making your rifle lightweight yet solid. And unlike the Lancer Tactical G2 rifles, the Hybrid series AEGs feature a full metal railed handguard. If you want the best of both worlds, Hybrid is the way to go.

The 6.03mm stock tightbore barrel further increases range and FPS, and an injected polymer rotary style hop-up adjusts BB spin effortlessly for maximum precision. Upgraded with an 18:1 reinforced steel gear set to provide a quicker cycling rate and 8mm bushings to enhance the operational smoothness of your gears. These upgraded internals increase shot to shot consistency with minimal wear to your internals. The powerful 25k high torque motor is regulated to maximum efficiency with low resistance copper wiring and a bonus battery protection feature! When low voltage is detected from a drained battery, an automatic cut off keeps equipped batteries from draining completely, vastly increasing battery life and longevity. Replace your springs and alter your FPS without opening up your gearbox! A true quick change spring system enables adjustment from CQB to outdoor and back through unlocking the mechanism secured inside the buffer tube.

## THE LANCER "FAST TRIGGER"

Lancer Tactical Hybrid Gen 2 AEGs come fully equipped with the Lancer Fast Trigger just like the ProLine series. Modeled with a bladed flat trigger design, an ETU and a MOSFET all located within the gearbox, additional wiring has been reduced, amplifying trigger response. The Lancer Fast Trigger pushes about 20-25 RPS, and shoots consistently within a 2-3 FPS range.

## LEGION HPA SYSTEM

### WHAT IS IT?

High pressure air (HPA) airsoft guns use compressed air to fire out BBs. It's quite a unique system that takes components of gas blowback systems and Automatic Electric Guns (AEGs), making a completely different system that is mechanical pneumatic.

### MAKING THE SWITCH

When making the switch from AEG to HPA, you don't have to worry about typical AEG maintenance issues. Instead of having a motor move the gears, pushing the spring back, building pressure in the cylinder and releasing it through the nozzle to force the BB out of the barrel, a HPA engine just has air pushing straight through the nozzle, thus shortening the time and process by incredible lengths. You just need a tank with regulator, line, and engine.

HPA ENGINE PUSHES THE AIR THROUGH THE NOZZLE, PROJECTING THE BB THROUGH THE BARREL.

REGULATOR ALLOWS THE FIELD TO LIMIT THE PSI (POUNDS PER SQUARE INCH).

A COMPACT TANK IS STORED IN THE STOCK.

PTS EPM magazine sold separately.

## M40A3 SNIPER RIFLE

### PRODUCT FEATURES

- High quality dense polymer body with reinforced full metal bolt assembly
- Smooth bolt pull and push that makes it easier to load and charge each round
- Replica to the real M40A3 sniper rifle with improved steel bolt and metal rails
- Unique stippling on body for better grip and hand placement
- Long flush inner barrel improving accuracy especially at longer distances
- Picatinny rail mount on bottom for mounting bipods for improved stability
- Optic mount that allows a variety of different rifle scopes with magnification
- Adjustable cheek riser ensures that your your eye is completely aligned with a rifle scope
- Included magazine holds up to 27 rounds and easily loads with speedloader
- Shoots approximately 410 to 430 FPS using 0.20g BBs, making it field-ready for any airsoft sniper

### SPECIFICATIONS

OPERATION	SPRING BOLT ACTION
MATERIAL	METAL OUTER BARREL, BOLT, PICATINNY RAILS / POLYMER HANDGUARD, STOCK
VELOCITY	410 - 430 FPS
MAGAZINE CAPACITY	27 ROUNDS
HOP-UP	YES, ADJUSTABLE
ACCESSORIES	SNIPER MAGAZINE (LT-M40MAG)

## LTX-6 KNIGHTSHADE

### SERIES SPECIFICATIONS

OPERATION	GREEN GAS BLOWBACK
MATERIAL	FULL METAL
VELOCITY	300 - 330 FPS
MAGAZINE CAPACITY	20 ROUNDS
COMPATIBILITY	TM
HOP-UP	YES, ADJUSTABLE
COLOR	BLACK
MSRP	\$165.65
ACCESSORIES	20RD GREEN GAS MAGAZINE (LTX-6B-MAG)

### PRODUCT FEATURES

- Lancer Tactical's first Hi-Capa pistol
- 100% TM compatible
- Aluminum Slide
- TM and WE TECH magazine compatibility
- Front and rear fiber optic sights
- Integrated accessory rail for lights and lasers
- Non-slip textured pistol grip
- Safety located on right side
- Blowback action with slide locking back when magazine is spent

## LTX-3 DEFENDER

### SPECIFICATIONS

OPERATION	CO2 HALF BLOWBACK
MATERIAL	POLYMER
VELOCITY	340 - 360 FPS
MAGAZINE CAPACITY	15 ROUNDS
COMPATIBILITY	N/A
HOP-UP	YES, NON-ADJUSTABLE
PROPELLANT	CO2
COLOR	BLACK
MSRP	\$44.95
ACCESSORIES	15RD MAGAZINE (LTX-3B-MAG)

### PRODUCT FEATURES

- Front and rear fiber optic sights
- Integrated accessory rail for lights and lasers
- Textured grip for comfortable handling
- Rear slide serrations
- Safety located on right side
- Double-action trigger with smooth pull
- Slide does not need to be racked to chamber BB
- Blowback action with slide locking back when magazine is spent
- Uses standard 12g CO2 cartridges located inside magwell

## LTX-50 COBRA

### SPECIFICATIONS

OPERATION	CO2 HALF BLOWBACK
MATERIAL	FULL METAL
VELOCITY	310 - 340 FPS
MAGAZINE CAPACITY	15 ROUNDS
COMPATIBILITY	N/A
HOP-UP	YES, NON-ADJUSTABLE
PROPELLANT	CO2
COLOR	BLACK
MSRP	\$69.95
ACCESSORIES	15RD MAGAZINE (LTX-50B-MAG)

### PRODUCT FEATURES

- Three white dot combat sights
- Integrated accessory rail for lights and lasers
- Non-slip, scaled pistol grip panels
- Front and rear slide serrations
- Safety located on right side
- Double-action trigger with long, smooth pull
- Slide does not need to be racked to chamber BB
- Blowback action with slide locking back when magazine is spent
- Uses standard 12g CO2 cartridges located inside magwell
- Integrated lanyard loop for pistol retention systems

As Shown: USLR-RHINO-AIR-S

## RHINO REVOLVER 50DS .357 MAGNUM

### OVERVIEW

The Rhino 50DS sports a unique design that sets it apart from other revolvers. The barrel aligns with the bottom of the cylinder, lowering the bore axis. Over to the rear, a low-profile hammer acts as a cocking device. The actual firing mechanism sits internally, allowing you to shoot in both double action or single action. A red indicator indicates whether the internal hammer is cocked or not.

### SERIES VARIATIONS

SKU	SKU	VELOCITY	MSRP
REVOLVER CHIAPPA RHINO AIRGUN (BLACK)	USLR-RHINO-AIR-B	400 - 430 FPS	\$149.99

REVOLVER CHIAPPA RHINO AIRSOFT CO2 PISTOL (SILVER)	USLR-RHINO-CO2-S	300 - 330 FPS	\$179.99

## STF/12 PUMP ACTION SHOTGUN

### PRODUCT FEATURES

- Officially licensed by FABARM
- Aggressively designed muzzle break
- 20mm picatinny under rail attaches foregrips
- Skeletonized full stock can be shouldered for stability
- Front and rear sling points can be used to attach various sling types
- Strong polymer build and barrel assembly
- Shotgun shoots BBs in a tri-shot spread design
- Ergonomic pistol grip provides comfort while in use
- Uniquely designed fore-end gives more grip for easier pumps
- Removable fiber optic sights enhance target acquisition
- Removeable picatinny top rail

### SPECIFICATIONS

OPERATION	SPRING ACTION
BRAND	BO MANUFACTURE
MATERIAL	POLYMER BODY, BARREL ASSEMBLY
VELOCITY	300 - 330 FPS
MAGAZINE CAPACITY	30 ROUNDS (PER SHELL)
OUTER BARREL LENGTH	280 MM
LENGTH	32"
WEIGHT	4 LBS
PACKAGE INCLUDES	SHOTGUN, 2 SHELLS, REMOVABLE SIGHTS

## OVERLORD MOSIN-NAGANT M44 CO2 WWII RIFLE

### SPECIFICATIONS

SKU	USLR-LG2065
BRAND	BO MANUFACTURE
OPERATION	BOLT ACTION CO2
MATERIAL	METAL / POLYMER
VELOCITY	328 FPS
PROPELLANT	CO2
LENGTH	33.25"
WEIGHT	9 LBS 5 OZ
COLOR	IMITATION WOOD
MSRP	\$329.98

### PRODUCT FEATURES

- 1:1 scale replica World War II rifle used by the Russian infantry
- Rifle equipped with a fiberglass dummy bayonet - articulated and realistic
- Weathered metal parts for a 'vintage finish'
- Dark wood imitation stock
- Mosin-Nagant strap provided
- Fixed hop-up

# OVERLORD MP40 SUBMACHINE GUN

## SPECIFICATIONS

SKU	USLR-LG2055
BRAND	BO MANUFACTURE
OPERATION	ELECTRIC AUTOMATIC BLOWBACK (EBB)
MATERIAL	STEEL RECEIVER, MAGWELL, STOCK / ALUMINUM OUTER BARREL / BAKELITE STYLE PISTOL GRIP
VELOCITY	290 - 300 FPS
GEARBOX	FULL METAL VERSION 3
CONNECTOR	MINI TAMIYA
BATTERY	8.4V BRICK (NOT INCLUDED)
MAGAZINE CAPACITY	100 ROUNDS (MID-CAPACITY)
HOP-UP	YES, ADJUSTABLE
MSRP	\$459.00

## PRODUCT FEATURES

- 1:1 scale replica of German-issued MP40 of World War II
- Full steel construction, aluminum outer barrel
- Realistic weather finish gives it a battleorn look
- Fully assembled by hand with unique serial numbering on each part
- Electric blowback system provides added realism
- Full metal Version 3 gearbox with high torque motor and 8mm bearings
- Great attention to detail on dark brown bakelite-style furniture
- Underfolding wire full steel stock
- Shoots 18 rounds per second with 11.1V LiPo battery
- Shoots in full-auto only just like the real MP40

As Shown: CA0113

As Shown: CA0143

## BREAK BARREL AIR RIFLE

### QUANICO RIFLE

- Break barrel system
- Automatic security when armed
- High density polymer stock adjustable on 3 axes
- Adjustable height and length stock with adjustable cheek support.
- Double 21mm Picatinny mounting rail system and 11mm rail (under Picatinny rail)
- Fiber optic adjustable sights
- Extremely deep bluing
- High-end Internal parts

### QUANICO BIS RIFLE

- Break barrel system
- Automatic security when armed
- High density polymer stock adjustable on 3 axes
- Adjustable height and length stock with adjustable cheek support
- Double 21mm Picatinny mounting rail system and 11mm rail (under Picatinny rail)
- Fiber optic adjustable sights
- Extremely deep bluing
- High-end Internal parts
- Full steel twisted barrel

### PENDLETON TACTICAL RIFLE

- Break barrel system
- Hi density polymer stock
- 5 positions telescopic stock (AR15 style, fits all AR15 stocks on tube)
- 21mm Picatinny mounting top rail
- Picatinny side and bottom rails for accessories
- Removable pistol grips
- Adjustable fiber optics sights
- Deep bluing treatment
- High-end internal parts

### BENNING RIFLE

- Break barrel system
- Adjustable stock with cheek riser
- 21mm Picatinny mounting top rail
- Durable and heavy construction
- Adjustable fiber optic sights
- Full steel twisted barrel
- Deep bluing treatment
- High-end internal parts

## M2 HPA HEAVY MACHINE GUN

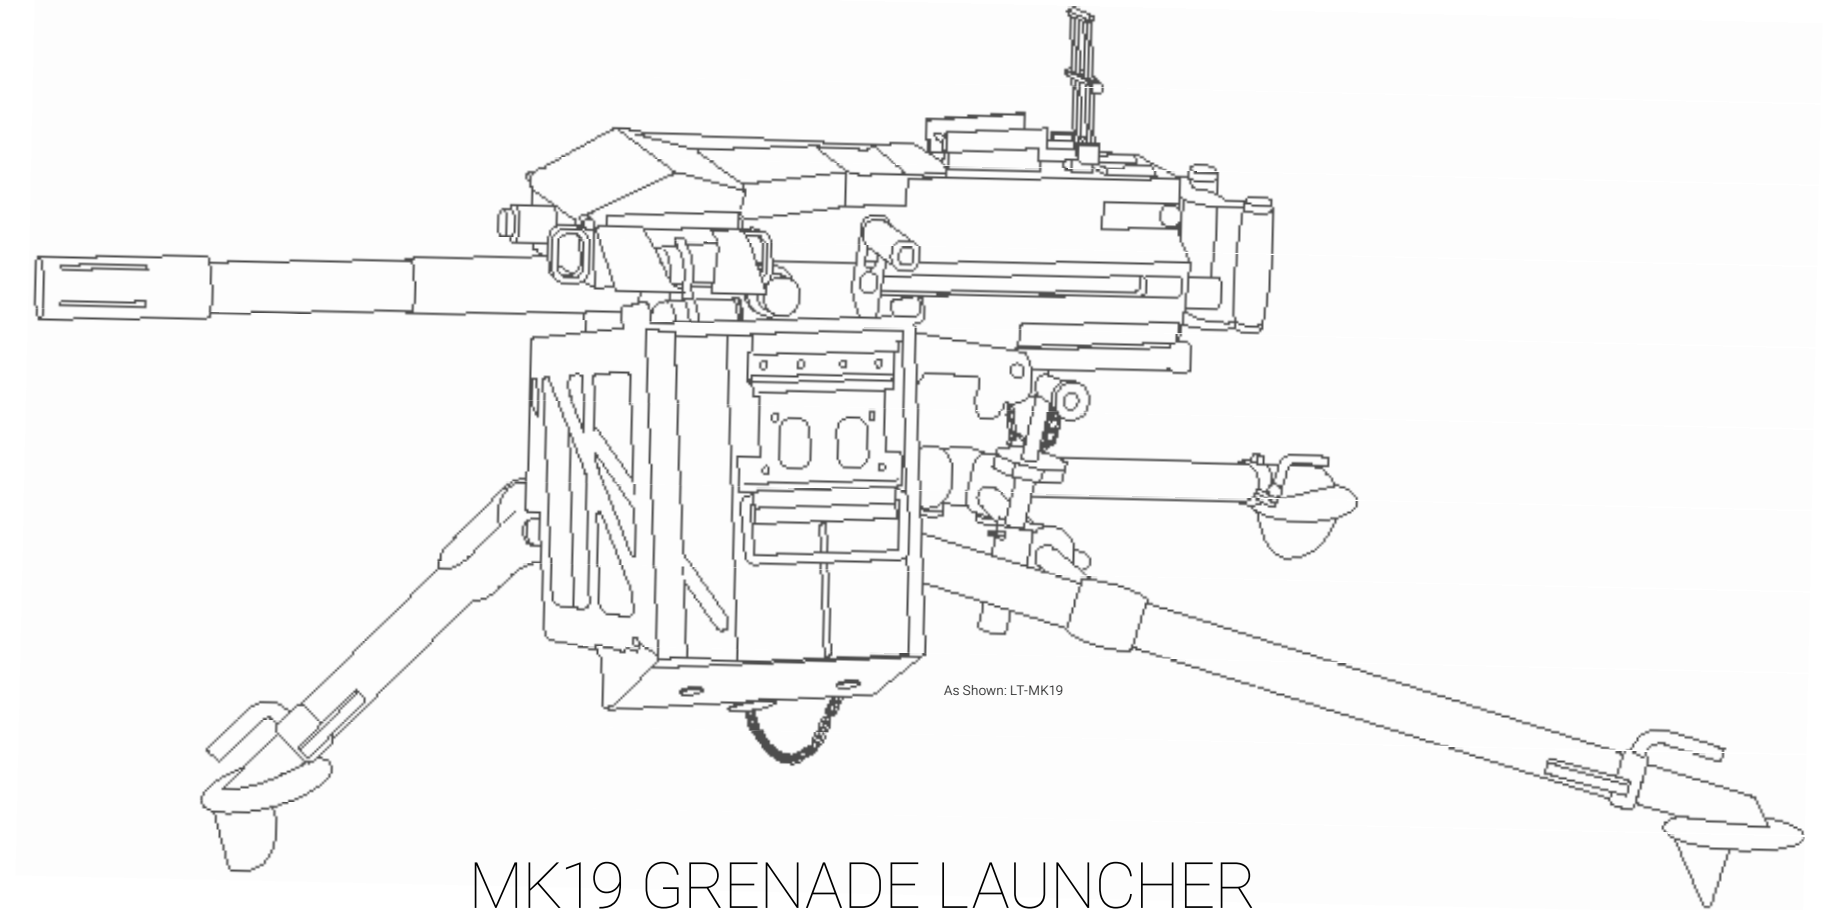

### HISTORY

The M2 machine gun, aka "ma deuce," is the oldest machine gun currently in production anywhere in the world. Designed by legendary designer John Browning, it was widely used by land, naval, and air forces in World War II. In addition to being used by infantry forces mounted on a tripod, variants of the M2 machine gun have also been used in aircraft, mounted on wheeled and tracked vehicles, and even fitted with telescopic scopes and used for long range sniper work.

### SPECIFICATIONS

SKU	LT-M2
MATERIAL	STEEL
MAGAZINE CAPACITY	2500 ROUNDS
MAGAZINE COMPATIBILITY	M249 MAGAZINE
PROPELLANT	HPA
HOP-UP	ADJUSTABLE
LENGTH	65"
WEIGHT	61.7 LBS

## MK19 GRENADE LAUNCHER

### OVERVIEW

The Lancer Tactical MK19 Grenade Launcher, based off the 40mm belt-fed grenade launcher primarily used by the U.S. Armed Forces, is an intimidating airsoft gun chambered in 6mm. This 1:1 scale replica is a functional airsoft gun. Equipped with two inner barrels, you can double tap your targets with each shot. The MK19 is designed for Military Simulation operations and is built with two HPA engines, delivering round after round in full auto.

## E-RAZ GRENADE

### SPECIFICATIONS

BRAND	Z-Parts
OPERATION	Green Gas
MATERIAL	Fiber Polymer / Metal Sphere
COMPATIBILITY	Fits in 40mm Grenade Pouches
LENGTH	2"
HEIGHT	3.5"
WEIGHT	5 OZ

### PRODUCT FEATURES

- High density polymer build is lightweight but can withstand multiple drops and is completely reusable
- Simple to use: insert pin, fill grenade with green gas, use standard speedloader to pour in 100 BBs, and you're ready to go
- Disperses a complete 360 degrees after pulling pin and making impact on surface
- Perfect for clearing rooms and taking out multiple opponents within the area (ask your local field first before using)
- Fits a 40mm grenade pouch making it great for most players who already own these pouches
- Can hold up to 100 rounds of 6mm BBs and uses standard green gas (fill for six to eight seconds)
